Dear All

The National Bundle of Asthma Care for Children and Young People launched in September 2021. The ambition is to reduce avoidable harm to children and young people with asthma and improve their quality of life.

A key element is to ensure relevant training is accessible for all professionals. The capability framework has now been launched, with five tiers of training according to level of care provided. Tiers 1 to 3 are free, and easily accessible through e-learning for health.

All staff should complete relevant training. For example GP reception staff and health care assistants tier 1 (45mins e-learning), health visitors and practice nurses tier 2 (2.5 hours e-learning) and GPs, paediatricians, doctors in training, clinical pharmacists and nurses with a specialist interest in asthma tier 3 (Around 6 hours e-learning). The modules are superb and freely accessible.

Please cascade this letter and flyer to all professionals in your organisation, and provide time for staff to complete their training.

With best wishes

Dr Stephen Goldring  
Paediatric Consultant, Hillingdon Hospital  
North West London CYP Asthma Clinical Lead

Michael Griffiths  
CYP and Maternity Programme Delivery Manager  
NHS North West London
