About the project

Participants can expect to experience:

- One-to-One mentoring support, designed to enable participants to build a relationship with their mentor over time, supporting participants to identify, assess, and address their barriers, as well as sourcing the most appropriate support.
- Individualised progress plans, which are tailored to each participant; include identification of the wraparound support that needs to be provided (e.g., support to access housing or mental health services); and set meaningful and achievable goals to enable the participant to see progress against their plan.
- Access to a series of workshops covering topics such as inter-personal skill development, employability skills and mental and physical wellbeing.
- A record of distance travelled which demonstrates how far the participant has travelled since joining the project, for example, in terms of personal development, increased confidence, and greater levels of motivation.
