Fully Funded 2-Year Maths Mastery Specialist Programme (Includes 7.5 Days Release Funding)

Dear Colleagues,

We wanted to share an excellent professional development opportunity: the **NCETM Secondary Mastery Specialist Programme (2026/27)**.

This is a **fully funded, two-year national programme**, including **funding for up to 7.5 days of teacher release time per year**. The school will receive funding for their release.

Why nominate someone in your school to become a Secondary Mastery Specialist?

- **Deepen their expertise** in Teaching for Mastery through high-quality, NCETM-led training
- **Lead improvement in your maths department**, shaping curriculum, pedagogy and assessment
- **Collaborate, share ideas and learn from others** across local and national schools
- **Develop leadership skills** within your school to drive sustained change, with nationally accredited professional development.
- This programme supports both **professional growth** and **lasting improvement for your school and students**.

Application deadline: 23 April 2026

Applications and a short video to hear directly from past participants about how the programme has revolutionised their pedagogy and classroom practice are all available via the [NCETM website](#).

We would be delighted to see you take this next step in your professional development. If you'd like to talk this through or ask any questions, please contact us at lcw@lcwmathshub.co.uk or [click here](#) to arrange an online meeting.

Warm regards,

Valbona Baci / Maths Hub Lead
