PPE to get back
to Learning
Safely

Orange Monkey Group LTD
Support@omg.limited

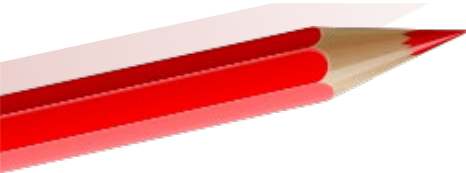

Who are we?

The Orange Monkey Group supply various products to national retailers including John Lewis, Gift Universe and QVC.

We specialise in educational and wellbeing products where we have good experience of working with councils, schools and even parts of the NHS.

Due to our unique positioning of importing goods we were able to access many in demand products when the pandemic hit the UK. Now our supply has expanded to mainly source from UK manufacturers.

Education has Changed
and we're here to help

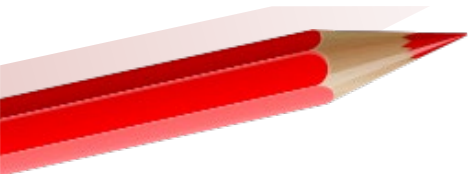

- Due to the unprecedented situation for educational organisations there is now a new normal
- We have been helping many establishments continue to operate during the crisis whilst keeping their staff safe
- Staying safe but keeping the welcome warm

Support@omg.limited

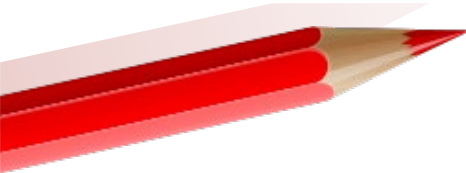

The Need

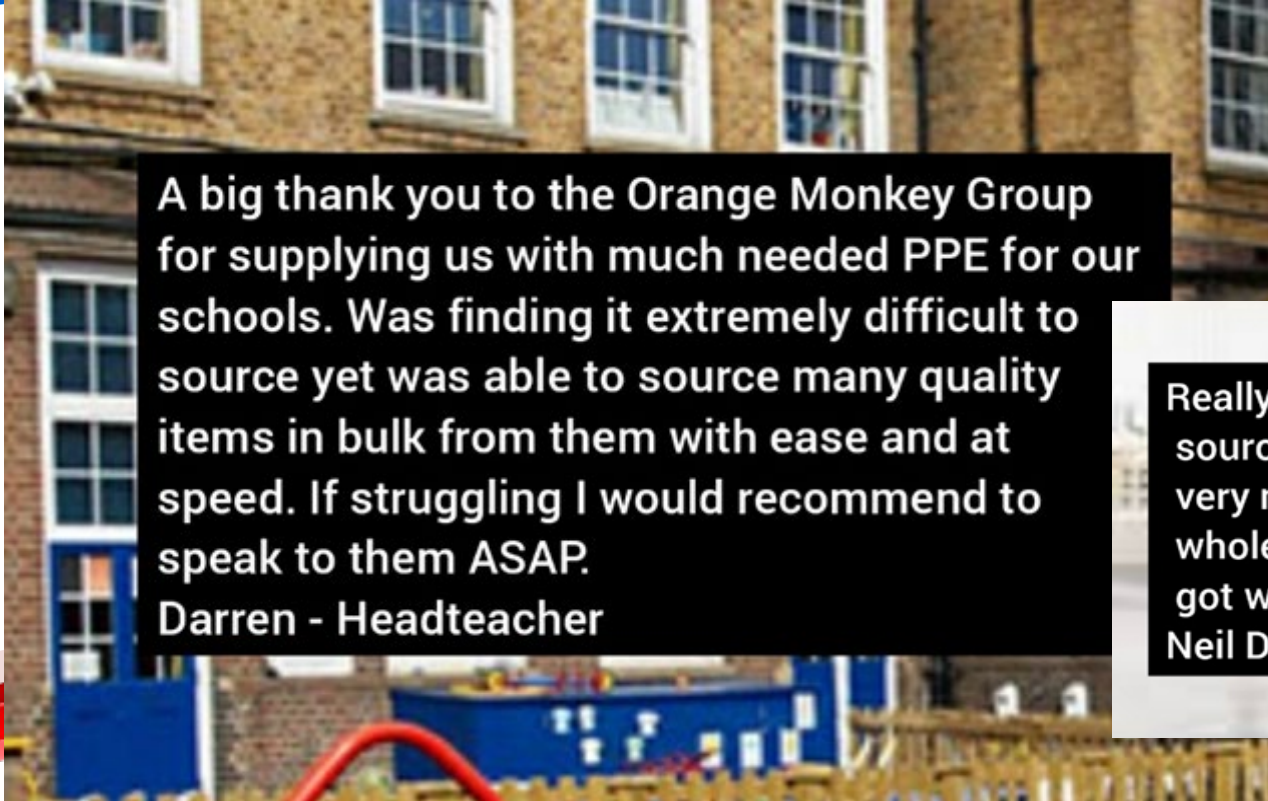

- As the UK corona virus lockdown has eased, all educational establishments will need to provide security to parents that their children are well protected and to children, students and teachers that they are learning or operating in a safe environment
 - The ease of cross contamination means bacteria or other micro-organisms are unintentionally transferred from one substance or object to another, with a harmful effect and spread. Due to this, correct sanitation should be available to all children, students and teachers within these establishments
- 

The Need

- We are the one stop for support, advice and equipment to make sure your establishment has everything it needs to keep staff safe
 - All products are fully certified and tested to the highest standards. We have been supplying schools, offices, salons and other businesses
 - Offering different price point solutions to ensure your establishment can have a solution which is right for you
- 

What our Customers are saying!

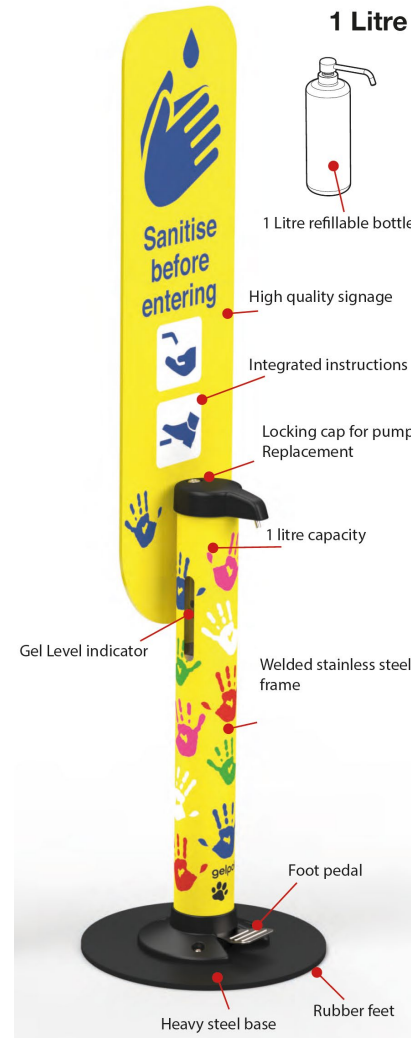

**A big thank you to the Orange Monkey Group for supplying us with much needed PPE for our schools. Was finding it extremely difficult to source yet was able to source many quality items in bulk from them with ease and at speed. If struggling I would recommend to speak to them ASAP.
Darren - Headteacher**

**Really happy with the Orange Monkey Group who helped us source protective equipment for our IT business when it was very much needed. They were very honest with us throughout the whole process and went to extra lengths to make sure we got what we needed.
Neil Director - Central London**

Sanitiser

support@omg.limited

Sanitiser solutions for all situations

- Due to our retail relationships we have direct supply from key sanitiser brands such as CutiCura and SureSan so you can be sure of getting a well reputable quality product
- Our sanitation solutions include small antibacterial gels, antibacterial wipes, cleaning sprays and canister refills for dispenser units. We have access to much more than we show so if you want something specifically let us know!

Masks, Visors & Gloves

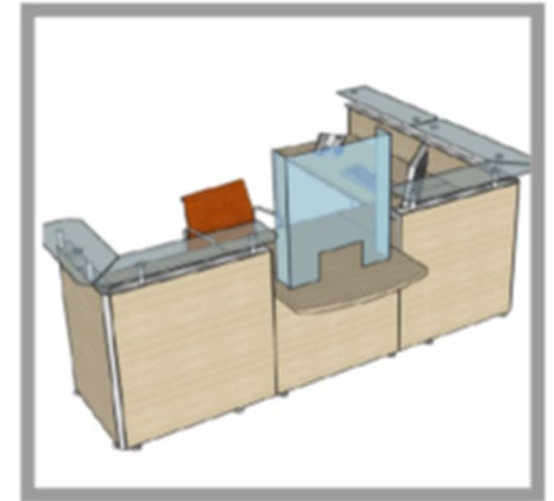

- We supply masks from UK manufacturers which are of medical standard. Both 3-ply we offer are fluid resistant as we offer Type II and Type IIR
- Visors are anti fog proof so provide a much easier and more comfortable experience especially when wearing for long periods of time
- Thankfully even though there is a global shortage of certain gloves we have been able to provide these for our clients including our Nitrile gloves which are of AQ 1.5 standard
