

Addendum for POC January 2021 – School Place Planning

Planning underway to review surplus places in primary schools

Officers have begun to review the January Census rolls (normally higher than October) and the Reception application numbers for September 2021 and the revised projections. This helps us gauge trends and officers have begun discussing with schools and Trusts, dioceses and then brief the Lead Member on options and then the POC. Where relevant, there will also be some discussions with neighbouring LAs and DfE.

Some schools have specific circumstances and much of the excess vacancies are in 'half forms' making it difficult to reduce PAN. Complex decisions will be needed in some areas to balance the desire of some parents to attend schools that are not directly local to them, and the impact that has on all pupils due to the organisational, staffing and financial pressures put on a significant minority of schools by increased pupil mobility and difficult class sizes.

The table below shows the total numbers on roll in October Census 2020 compared to 2019.

The figures show the total in each Primary Planning Area by year groups, noting the schools included in each Primary Planning Area.

School Planning Area and schools within each Primary unless noted I or J	NC Year Actual	2019AUT	2020AUT	Diff	Diff%
